

CORPORATE PROFILE

Spectra Group (UK) Ltd provides a full range of telecommunication services and solutions to clients operating in many different sectors including government, military, aid agencies, education, commercial and security. All our highly trained and motivated specialists have security clearance and are committed to delivering the highest level of service to every client.

Spectra Group comprises four key divisions:

Spectra Resource Services

Spectra Resource Services provides the widest range of qualified telecommunications engineers with an awareness of hostile environments and able to deploy anywhere in the world at a moment's notice. Our resource database provides access to highly skilled personnel, both commercial and ex-military, with extensive, practical experience of the latest technologies and working unsupervised in hazardous and remote areas for prolonged periods.

Spectra serves as a "trusted advisor" in a wide range of defence, governmental and security sectors. We can assist organisations in the planning, optimisation, procurement and implementation of "best practice" in all forms of voice, data and wireless communications. Our consultants pride themselves on maintaining the highest level of knowledge and skills enabling the delivery of the best and most up-to-date solution for every customer.

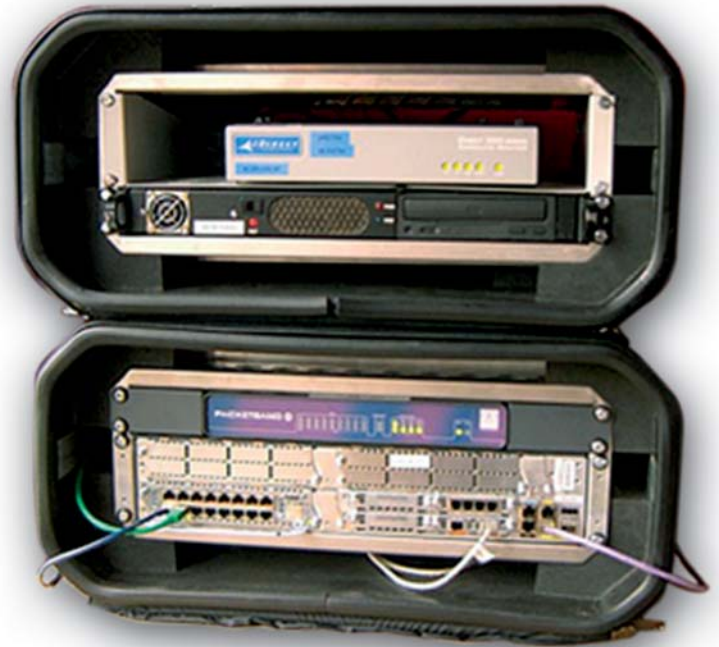

Spectra Telecom Solutions

Spectra Telecom Solutions provides a complete range of telecommunication solutions using the latest IT, wireless and satellite technologies from concept through to reality. We have built close relationships with 'best of breed' suppliers including many of the world's leading technology manufacturers and airtime providers.

Spectra provides a wide range of specialist services including design, supply, installation, commissioning, maintenance and technical support for your telecommunications network. We apply process, service delivery and supply chain management expertise to provide complete and efficient service packages, even in multi-vendor environments.

Spectra Information Systems

Spectra Information Systems provides a full range of information systems and networking services for clients in the government, commercial, defence and education sectors. We have extensive experience of designing, supplying, installing and maintaining corporate networks and information systems including wide area infrastructures, mobile working and secure messaging. We can also provide expert advice on all aspects of network security from spam and spyware protection through to physical security and active penetration testing.

Spectra Telecom Training

Spectra Telecom Training provides a complete training solution with standard and bespoke telecommunications programmes including the Training Needs Analysis (TNA), design and development of training material and training delivery. Our analysts fully understand the context in which this equipment is to be used and provide detailed recommendations including cost effective training solutions to meet client needs.

Spectra is also the UK's leading provider of commercial telecommunications-based resettlement courses for ex-military personnel wishing to continue their careers in the commercial security industry. They are designed to equip attendees with up-to-date knowledge of the communications equipment and the skills required to manage communications strategies deployed by security, governmental and aid organisations around the world.

Our professional instructors have real experience of working in some of the world's harshest environments and understand what it is like making the transition from the military. At a bespoke residential training facility at Kingstone, in the heart of Herefordshire, we take a close, hands-on approach to ensure that every attendee masters the practical technology and procedural skills required by employers.
